## OUR VISION:

# We will help save our planet!

paper  
water  
bottle™

**Our enthusiasm is high because the vision is worthy of our best efforts.**

When we began this journey, we knew we would need to create materials, methods, and a market. We knew no one had accomplished this before, and, while progress has been made, much remains to be done.

**We are grateful for your early support! Visit us at [PaperWaterBottle.com](http://PaperWaterBottle.com) for updates on our journey in the months and years to come.**

*Thank you!*

*We remain committed to complete the journey and trust you will be cheering us onward towards our goal!*
